1. TITLE

Design of a Styled College Information Portal using HTML and CSS

2. AIM

To develop a visually appealing college webpage utilizing external CSS stylesheets for layout, colors, and typography.

3. OBJECTIVE

The objectives of this experiment are:

- To link an external CSS stylesheet to an HTML document.
- To apply global reset and body styling.
- To structure a navigation menu with hover effects.
- To design a table showing facilities status.

4. THEORY

Cascading Style Sheets (CSS) is used to style the presentation of web pages. Separating CSS from HTML makes maintenance easier and reduces file size.

5. ALGORITHM / PROCEDURE

1. Create HTML page with header, nav, main, and footer elements.
2. Add content for home, about, courses, and facilities sections.
3. Construct a contact form.
4. Create an external style.css file.
5. Apply background colors, padding, and text alignment.
6. Design the navigation links with hover color changes.
